Stocks On Radar - Crest Builder Holdings (8591)

Author: AmInvest | **Publish date:** Wed, 21 Nov 2018, 08:55 AM

Crest Builder Holdings printed a white marubozu candle to breach the **RM0.92** resistance level. With a rising RSI level, a bullish bias may be present above this mark with a target price of **RM0.985**, followed by **RM1.05**. Meanwhile, it may turn sideways if it dips back below the **RM0.92** mark in the near term. In this case, the immediate support is anticipated at **RM0.85**, whereby traders may exit on a breach to avoid the risk of a further correction.

Trading Call: Buy on favourable consolidation above **RM0.92**

Target: **RM0.985, RM1.05** (time frame: 3-6 weeks)

Exit: **RM0.85**
